USDA ANNOUNCES FEDERAL FUNDING

(Beacon Estates Water Supply Corporation to Receive a \$202,000 Loan and Grant)

Brookshire, Texas, August 27, 2002 — Bryan Daniel, state director, Texas USDA Rural Development announced today that the Beacon Estates Water Supply Corporation received a \$202,000 loan and grant through the agency's Rural Utilities Service Water and Waste program. The effort is part of USDA's national program to help provide rural areas with safe, dependable water and modern sewage systems.

"One of the goals of USDA Rural Development is to provide water and wastewater treatment programs that target public health benefits and provide economic opportunities to America's rural communities," said Daniel. "With lower populations and tax bases than urban areas, rural residents can utilize our programs to help provide essential public services that will enhance the quality of life for all rural residents."

The funds will be used to install a 40,000-gallon storage tank, two booster pumps, a 4,000-gallon pressure tank, piping, electrical and controls to be used with the existing water well and distribution system. Population served by this project is 340.

In Fiscal Year 2001, \$65.5 million of loan and grant assistance was infused into 29 rural Texas communities. USDA's water and wastewater program is designed to bring fresh, clean drinking water and sanitary, environmentally sound sewage facilities to rural America's 53 million residents. Loans and grants are available to rural communities of fewer than 10,000 residents. Public bodies, corporations operated on a nonprofit basis, and Indian tribes, that are unable to obtain credit from other sources at reasonable rates and terms, are eligible for assistance.
